

ADJUSTMENT IN COMPENSATION TABLES

The benefit levels displayed below in the Adjustment in Compensation Tables are for 1992 to 2024 accident years. The tables show the maximum annual earnings levels, and legislative amounts to determine impairment awards, and fixed-rate benefits for surviving dependants of a deceased worker.

Background

On January 1 every year, the Workers Compensation Board (WCB) indexes benefit dollar amounts and the maximum annual earnings set out in *The Workers Compensation Act* (the Act).

When a claim is filed for a work-related injury with the WCB, the claim is assigned an eight digit claim number. The first two digits of the claim number indicate the accident year. This and other information will assist in determining certain benefits payable for an accepted workplace injury or illness.

The Act that is in force on the date of the accident applies to that injury or illness. A number of statutes have made changes to the Act. Bills 59, 25 and 18 have amended the benefit structure for certain periods. There are three main versions of the Act that are relevant today for the following time periods:

- accident years from 1992 to 2005.
- accident years from 2006 to 2021.
- 2022 accident year and later years.

Maximum Annual Earnings Levels

The Act is designed to protect workers against certain losses that arise from a work-related injury or illness. Depending on the date of the accident, there may be a ceiling on the amount of income that the Act will cover. This statutory ceiling is set out in section 46 of the Act and is called the maximum annual earnings level.

Table 1A below displays the maximum annual earnings levels for accident and recurrence years which occurred between 1992 and 2005. Table 1B shows the ceiling for workers who have a recurrence or relapse of a previous workplace injury or illness after 2005, if certain conditions are met. Table 2 presents the maximum annual earnings for accidents and recurrences after 2021. The recurrence ceiling level is in effect if certain criteria are met. There was no statutory ceiling in place for accidents between 2006 and 2021.

Impairment Award

Workers who have an accident which results in a permanent impairment are eligible to receive an impairment award. A permanent impairment includes the worker's loss of a body part, their use of a body part, system or function, or a change or disfigurement of any body part, system or function.

Accidents occurring between 1992 and 2005

Where the accident happened between 1992 and 2005, the impairment award payable to worker varies by their degree of impairment, their age and legislative amounts. For every year the worker is over the age of 45, the impairment award is reduced by 2%. The maximum reduction is 40% ($2\% * 20$) where the worker is 65 years or older.

For accidents between 1992 and 2005, the calculation of an impairment award is based on clauses 38(2)(a) (b) and (c) of the Act as it existed prior to January 1, 2006.

Accidents occurring after 2005

For accidents after 2005, the impairment award only varies by the degree of impairment and legislative amounts. Age is not a factor in calculating impairment awards for workers with accidents after 2005.

For this range of accidents, the calculation of an impairment is based on clauses 38(2)(a) and (b) of the current Act.

Tables 3 and 4 display the legislative amounts used to calculate impairment awards.

Table 3 – Impairment Legislative Amounts for Accidents occurring between 1992 and 2005

Survivors' Benefits/Benefits for Dependants in Fatality Cases

Benefits payable to surviving dependants of a deceased worker may include amounts based on the worker's earnings or fixed benefit amounts not linked to the worker's earnings. In this publication, only fixed amounts are discussed and displayed.

Where an accident results in the death of the worker, the WCB pays a death benefit to cover expenses like burial, cremation, memorial services and other incidental expenses related to the death. This specific benefit is set out in subsection 28(2) of the Act.

Subclause 29(1)(a)(i) of the Act provides for a fatal lump sum payment payable to a dependent spouse or common-law partner. For some dependent spouses and common-law partners, this benefit may be reduced based on the deceased worker's age and/or impairment award.

Children and other family dependants are eligible to receive monthly payments. These benefit levels and maximum totals for these individuals are set out in clauses 29(1)(b)(c) (d) and (e) and subsections 31(1) and (2) of the Act.

Worker's Accident Year or Year of Death – Benefit Amounts

Fixed fatal benefit amounts are calculated using the amounts applicable for the year of the worker's accident when a workplace accident happens between 1992 and 2005, regardless of the year of the worker's death. By comparison, these benefits are calculated using the amounts for the year of the worker's death when a workplace accident occurs after 2005.

Table 5 – Death Benefit and Fatal Lump Sum by Accident Year for Accidents occurring between 1992 and 2005
